BRITISH REVIEW

617 Sqn has made its final operational mission at Kandahar Air Base, Afghanistan on the 30th January with the venerable Tornado GR.4. The 119 members of the Squadron have returned back to Lossiemouth on 04th February having been replaced by 2 Sqn from Marham. Sadly, 617 Sqn will disband on 01st April 2014, but reform during 2016 as the RAF's first F-35 Squadron at Marham. This will make way for 6 Squadron to move their Typhoons from Leuchars to Lossiemouth in the next few months. This leaves only 15(R) as the only active Tornado Sqn at Lossiemouth as 12 Squadron will disband on 31st March 2014. It was announced by the Minister of State for Armed Forces that 2 Sqn will disband as a Tornado Squadron on 31st March 2015 and will re-equip to form a new frontline Typhoon Squadron at Lossiemouth.

Air Cadet flying operations at Syerston was under the command of 3 FTS at Cranwell. This duty was formally taken over on 31st January 2014 by newly the formed 2 Flying Training School who were last disbanded on 30th March 1997 at Shawbury.....

BRAMLEY - A visit round Bramley on 30.01 found all the ground instructional airframes as listed in the UK Review last month. But Chinook CH-47D 89-00159 was not present. It stated that Odiham had decided not to send an actual Chinook, but had instead sent a large ISO container kitted out inside as a mock Chinook fuselage etc. It was confirmed that Whirlwind HAR.10 XK970 is still present but is cut into large sections.

Updating the listing that appeared in the January MAR - there are no signs on the base to indicate that E/52 AVN has any presence there in connection with the UC-35As, so as stated last month we will continue to assume they are all assigned to D/52 AVN. UC-35A 97-0102 is not on the Kuwait Detachment as it has been present at Wiesbaden throughout November/December/January, but 99-0102 has been absent since November so it is the aircraft at Kuwait.

Only C-12U 84-0165 has received the CMWS modification and the other two have not.

1 MIB: RC-12X 92-13123 has been named "Buttercup" - portside under the data block.

The 2 RC-12Xs, 93-0698 & 93-0700, are believed by our Wiesbaden correspondent to be 224 MIB aircraft - but we await firm evidence.

UH-60A 84-23951 of C/1-214 AVN was noted during January at Wiesbaden on maintenance.
